

**INSTRUCTIONS
FORM F1
HAZARDOUS AND OTHER REGULATED
POLLUTANTS**

Department of Environmental Quality
Division of Air Quality
150 N. 1950 W.
Salt Lake City, UT 84116
Telephone (801) 536-4000

As is often the case, the equipment or process with HAP emissions may also have criteria emissions being reported on other form. Be sure that the Point Source ID, SCC, and Description match these other forms.

DAQ ID	For office use only.
Pt. Source ID	Provide the identification number associated with the process.
Criteria Emissions Reported on form #	If the process has criteria pollutants being reported on other forms write in that form # (Ex. 11a, 6b, 15)
SCC	Enter the appropriate Source Classification Code (SCC) associated with the process. See the General Instructions for explanation.
Description of Process to Generating Emissions	Describe the process or equipment which causes or contributes the air emissions at this source. Be precise. Please specify the types of engines for power generation processes (i.e., turbine, reciprocating, etc.).
CAS Number	A numerical identifier for the pollutant; some have more than one name that is commonly used. See the General Instructions, Table 8 for a list of the HAPs and Table 9 for Other Regulated Pollutants.
Chemical Name	See the General Instructions, Table 8 for a list of the HAPs and Table 9 for Other Regulated Pollutants.
Emissions (lbs/yr)	The emissions, in lbs/yr, for the pollutant. Note that there is a minimum value for each HAP, below which the emissions do not need to be reported. This is a facility total, not by an individual process - see Table 8 and Table 9.
Method of Estimating	Use applicable code from Table 6 of the General Instructions
Reported as VOC or PM10	This corresponds to whether the HAP is incorporated as VOC or PM10 being reported on another form. Refer to Table 8 in the General Instructions for which HAP pollutants are also PM10 or VOC.
